

Allegra makes unique connections

## Description

**Empowering healthcare communities through cutting-edge technology, Allegra is revolutionising the medical sector. It is dedicated to enhancing healthcare experiences through innovation and technology for a more connected and efficient healthcare system.**

default watermark

By providing healthcare providers with access to comprehensive information, Allegra enhances total individual care and keeps patients at the center of all developments.

### **Connecting healthcare providers**

Through Allegra's technology and software, healthcare providers are seamlessly connected, allowing them to access electronic health records, patient history and digital diaries. This integrated system ensures that all relevant role players and stakeholders are connected, creating a unique health information exchange in sub-Saharan Africa.

**Allegra's comprehensive services include:**

- Processing over three million financial and clinical transactions monthly
- Serving 10,430 pharmacies and other healthcare providers across six countries
- Offering solutions to 1,215 pharmacies, clinics and auxiliary healthcare providers in five countries

**AllegraCare solutions include:**

- Pharmacy: A user-friendly software solution integrating a personal medication record and dispensing with clinical data and VirtualCare™.
- VirtualCare™: A telehealth solution that brings healthcare providers closer to their patients, enabling consultations from anywhere, anytime.
- Biokineticist: Providing health, fitness and weight management assessment services.
- Nurse: Managing pharmacy clinics and independent primary healthcare practices with real-time clinical and financial switching.

**Allegra's key features**

- Fully configurable to support various healthcare services
- Real-time financial claiming and disaster recovery
- Online diary and booking system for seamless appointment management
