

A commitment with real meaning

Description

The Forensics department held its own solemn commitment ceremony in Block D in March. It's all about going the extra mile to achieve greatness.

When the team signed the wall, we committed to giving everything. We committed to being ethical, professional, for a bigger purpose, for sustainable healthcare for all, and to do the right thing.

There's a great need in our country to live higher ethical values, and it starts with us and what we do every single day.

What it means to be committed:

- If you're interested, you'll do what's convenient. When you're committed, you'll do whatever it takes.
- Commitment means staying loyal to what you said you're going to do, long after the mood when you said it has left you.
- When confronted with a challenge, the committed heart will search for a solution while the undecided heart searches for an escape.

Commitment is what transforms a promise into reality. We are blessed to be part of this journey of making a difference.

When things get tough, we will remember what we committed to and what our purpose is.
