

Finding new opportunities

Description

The Clinical Risk Specialist team enjoyed a lunch at the V&A Waterfront in Cape Town recently to wish Christine Wilkinson well in her new role as Senior Specialist: Product Support in Ayesha Kriel's Disease Management team.

Christine baked an impressive cake for the occasion, which the team enjoyed after a light meal at Cape Town Fish Market.

Christine played a critical role in the Clinical Risk Specialist team responsible for Parmed, and previously provided support for Sasolmed and Nedgroup. She also provided key support on Bonitas.

Although she'll be sorely missed, the Clinical Risk Specialist team are confident Christine will flourish in her new role as part of the Disease Management strategic team.
