

Our employee travel survey is a must

## Description

**The health of our natural environment has a massive impact on our daily lives, and we each have an important role to play in reducing global warming, which results in severe and adverse weather events.**

Floods, drought, heatwaves, snap freezes – the devastating effects of climate change pose a significant health threat to all of us, as individuals and as a business. To mitigate our direct environmental impact, the AfroCentric Group aims to continuously improve our performance by diversifying and reducing our use of natural resources and preventing pollution.

But it's not just up to the business to make a change. Each of us has a role to play in reducing our carbon footprint, helping to reduce global warming.

## [Do your bit for the environment](#)

- Avoid driving in peak traffic hours
- Avoid short car journeys
- Form a lift club with colleagues in your neighbourhood
- Consider using public transport
