

Joining forces for employee health

Description

In a collaboration poised to revolutionise employee healthcare, AfroCentric Wellness and Pharmacy Direct partnered to provide a new and improved healthcare service for all AfroCentric Group and Sanlam Group employees.

This new wellness initiative aims to enhance access to medication and healthcare support, ensuring that chronic conditions are managed effectively and efficiently.

Awareness around our collaboration with Pharmacy Direct has been part of all Sanlam Group Wellness events over the past three months, and on 31 July 2024, it was sealed and celebrated at the Sanlam Retail Mass Wellness Event.

A new era of healthcare convenience

With the ever-growing demands of the modern workplace, employees often find it challenging to balance work and personal health. Recognising this need, AfroCentric Wellness has developed an innovative solution that brings healthcare directly to the workplace. Now, employees can have their chronic medication delivered directly to the AfroCentric Wellness Clinic at their offices, providing them with a seamless healthcare experience that goes beyond mere convenience.

This approach not only streamlines the process of medication delivery, but also offers employees the opportunity to consult with a primary healthcare nurse. This access ensures that employees receive professional guidance on medication compliance and management, helping to keep chronic conditions under control.

Benefits of the collaboration

This partnership offers numerous advantages to employees, the AfroCentric Group, and Sanlam Group as a whole:

1. **Enhanced healthcare access:** Employees now have easier access to medication and healthcare professionals at their workplace, reducing the need for time-consuming visits to external pharmacies.
2. **Professional support:** With a primary healthcare nurse available on-site, employees can receive expert advice and monitoring, ensuring their primary health needs are met promptly and effectively.

3. **Increased compliance:** The presence of a healthcare professional encourages medication adherence, leading to better management of chronic conditions and improved overall health outcomes.
4. **Cost-effective solution:** By streamlining the medication delivery process, the collaboration reduces costs associated with healthcare management, benefiting both employees and the organisation.
5. **Holistic employee well-being:** The partnership underscores the commitment of both companies to employee well-being, promoting a healthier and more productive workforce.

About Pharmacy Direct

Pharmacy Direct is a subsidiary of the AfroCentric Group and a leading courier pharmacy in South Africa, renowned for its commitment to providing accessible and efficient pharmaceutical services. With over two decades of experience, the company specializes in the delivery of chronic medication at no delivery fees, serving both individual patients and corporate clients with precision and care.

Their innovative approach to healthcare delivery has positioned them as a trusted partner in the South African healthcare landscape, making them an ideal collaborator for AfroCentric Wellness. By leveraging their extensive distribution network and expertise, Pharmacy Direct ensures that employees receive their medication promptly, with a focus on maintaining the highest standards of patient care and confidentiality.

About AfroCentric Wellness

AfroCentric Wellness is a subsidiary of the AfroCentric Group, a leading provider of health administration and wellness solutions across Africa. The company is dedicated to enhancing the well-being of individuals and communities through a holistic approach to healthcare.

We offer a comprehensive range of services, including health risk assessments, corporate employee wellness solutions, and access to digital wellness content. Our focus on preventative care and health education aligns perfectly with Pharmacy Direct's mission to promote medication adherence and chronic condition management.
